DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 rejected under 35 U.S.C. 102(e) as being anticipated by Burg et al., Patent #6,456,699.

Regarding claims 1 and 9, Burg teaches a system and method for generating an active voice page that provides interactive and real-time voice services to at least one user, the active voice page comprising at least one markup language document(79 Fig.5 and col.1 line 63-col.2 line12), the system and method comprising:
a subscription interface that enables the at least one user to subscribe to at least one service that can output personalized content (84 Fig.5 and col.9 lines 24-61);
an input module that receives data reports and a structure for a voice service (101,102 Fig.6);
a markup language converting module that converts the data reports and the structure into a markup language (82 fig.5, 103 fig.6, and col.4 lines 37-46); and
a blending module for blending the converted data reports and the converted structure

into the active voice page, wherein the personalized content is conveyed to the at least one user and the at least one user may respond to the at least one service(col.9 lines 24-61).

Regarding claims 2 and 10, Burg teaches the system and method of claims 1 and 9, wherein the markup language is extensible markup language (col.4 lines 26-46; the markup language can be easily extended and can be changed to a variety of formats).

Regarding claims 3 and 11, Burg teaches the system and method of claims 1 and 9, wherein the markup language is TML (*col.4 lines 26-46; HTML is a version of TML used for web pages*).

Regarding claims 4 and 12, Burg teaches the system and method of claims 1 and 9, wherein the data reports are online analytical processing system reports (col.7 lines 13-30 and col.9 lines 24-37; the data reports are analyzed and processed online).

Regarding claims 5 and 13, Burg teaches the system and method of claims 1 and 9, wherein the markup language converting module comprises a markup language generator that receives the structure and generates a markup language document from the structure (*col.5 line 58-col.6 line 6 and col.9 lines 24-37*).

Regarding claims 6 and 14, Burg teaches the system and method of claims 1 and 9, wherein the markup language converting module comprises a markup language transforming module that receives data reports from the input module and transforms the data reports into markup language documents (*col.4 lines 36-46*).

Regarding claims 7 and 15, Burg teaches the system and method of claims 6 and 14, wherein the markup language transforming module receives stylesheets from the input module and transforms the data reports into markup language documents using the stylesheets [col.4 lines 36-46 and col.9 lines 24-61; the stylesheets for each customer is obtained and transformed into a webpage(markup language)].

Regarding claims 8 and 16, Burg teaches the system and method of claims 1 and 9 further comprising: receiving one or more style properties that are unique to the at least one user and generating a call request for the at least one user from the active voice page and the style properties (col.9 lines 46-61).

Response to Arguments

2. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
